

## **Environmental policy**

Coventive Composites believes it is both good business practice and our duty to protect the natural resources of the communities we serve. In keeping with this belief, it is our policy to conduct our business in an environmentally responsible manner that protects the public, our employees, and the earth that we all share.

In addition to complying with all applicable environmental laws and regulations, we commit to:

- A. make environmental concerns an integral part of our planning and decision making process and commit sufficient resources to implement effective environmental programs;
- B. support research and development projects, programmes and technologies aimed at minimizing the environmental impacts of company operations, as well as introducing environmentally responsible technologies into the marketplace;
- C. practice sound environmental stewardship of all company-owned facilities and properties and all natural resources under our management;
- D. minimise, mitigate or restore any adverse environmental impacts caused by our operations;
- E. promote the efficient use of energy resources through cost-effective conservation and energy management programs;
- F. ensure the proper handling and disposal of all wastes, and minimize their creation while pursuing opportunities to recycle and reuse waste materials; and evaluate our environmental performance through periodic reviews and audits to ensure that our conduct is consistent with these principles.
